

Appendix A.

Progesterone Treatment and Cervical Length Screening: Provider Resources

17alpha hydroxyprogesterone (17P)

UNC Center for Maternal and Infant Health

The [17P Project webpage](#) on [mombaby.org](#) has information for providers regarding 17P in North Carolina including resources for care, references to studies, and videos. Additionally, the [Resources for Providers and Practices](#) section includes information on administration of 17P, journal articles, and a practice bulletin.

Cervical Length Measurement

Perinatal Quality Foundation

The Perinatal Quality Foundation provides the Cervical Length Education and Review (CLEAR) program through its [website](#). Individuals can participate in three online lectures, as well as an optional examination and scored cervical image review. For those that complete and pass the lectures, exam, and scored image review, documentation of completion of the program and CME credit hours are available. Additionally, this website provides cervical measurement image criteria.

The Fetal Medicine Foundation

The Fetal Medicine Foundation offers certification in cervical assessment on its [website](#). The website includes information on:

- Uses of sonographic measurement of cervical length
- Requirements for certification are through their program (attending online course and submission of cervical scans)
- Guidance on performing cervical length measurement
