

# Medical Relevance by Topic

This graph shows the level of medical relevance by topic. Note that topics with more green or dark green contain requirements that are more relevant to the topic and to physician expectations of their EHR system.

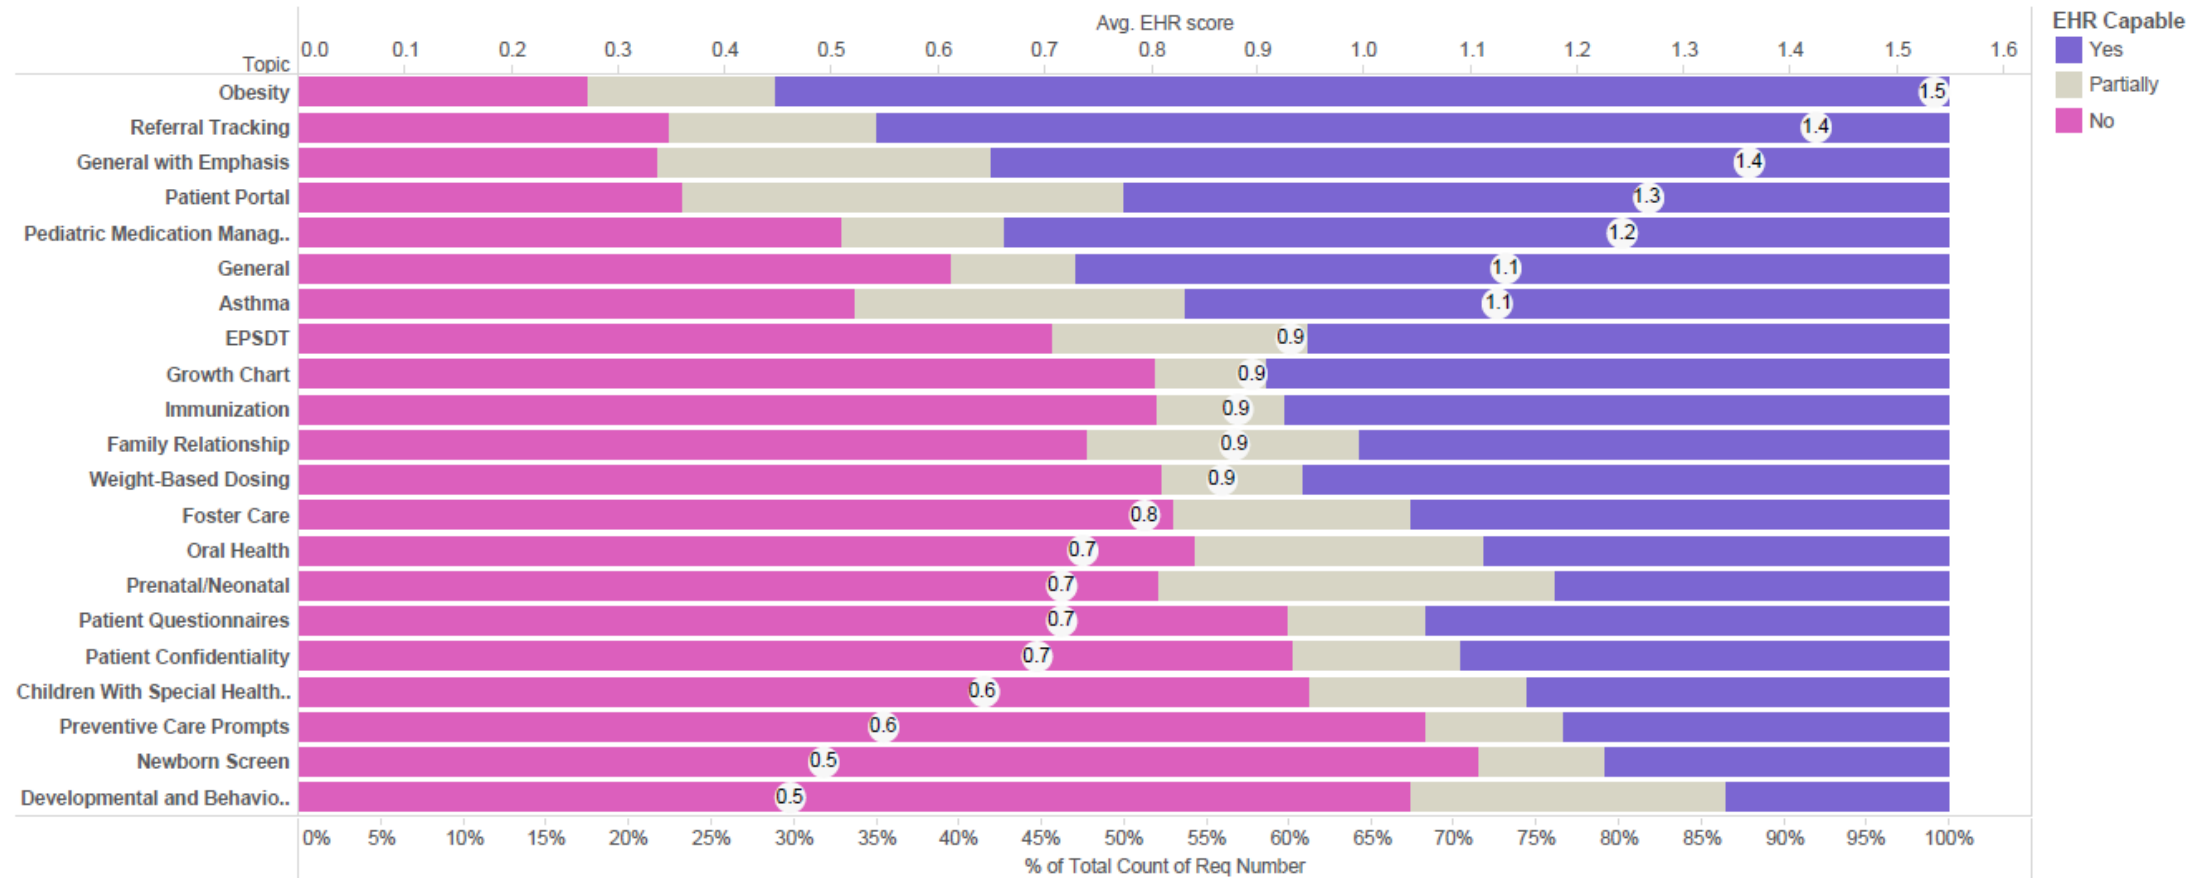

Medical Relevance by Topic

# EHR Capability by Topic

This graph shows the level of EHR capability by topic. Note that topics with more of the pink color contain more requirements that are not supported in current EHR systems.

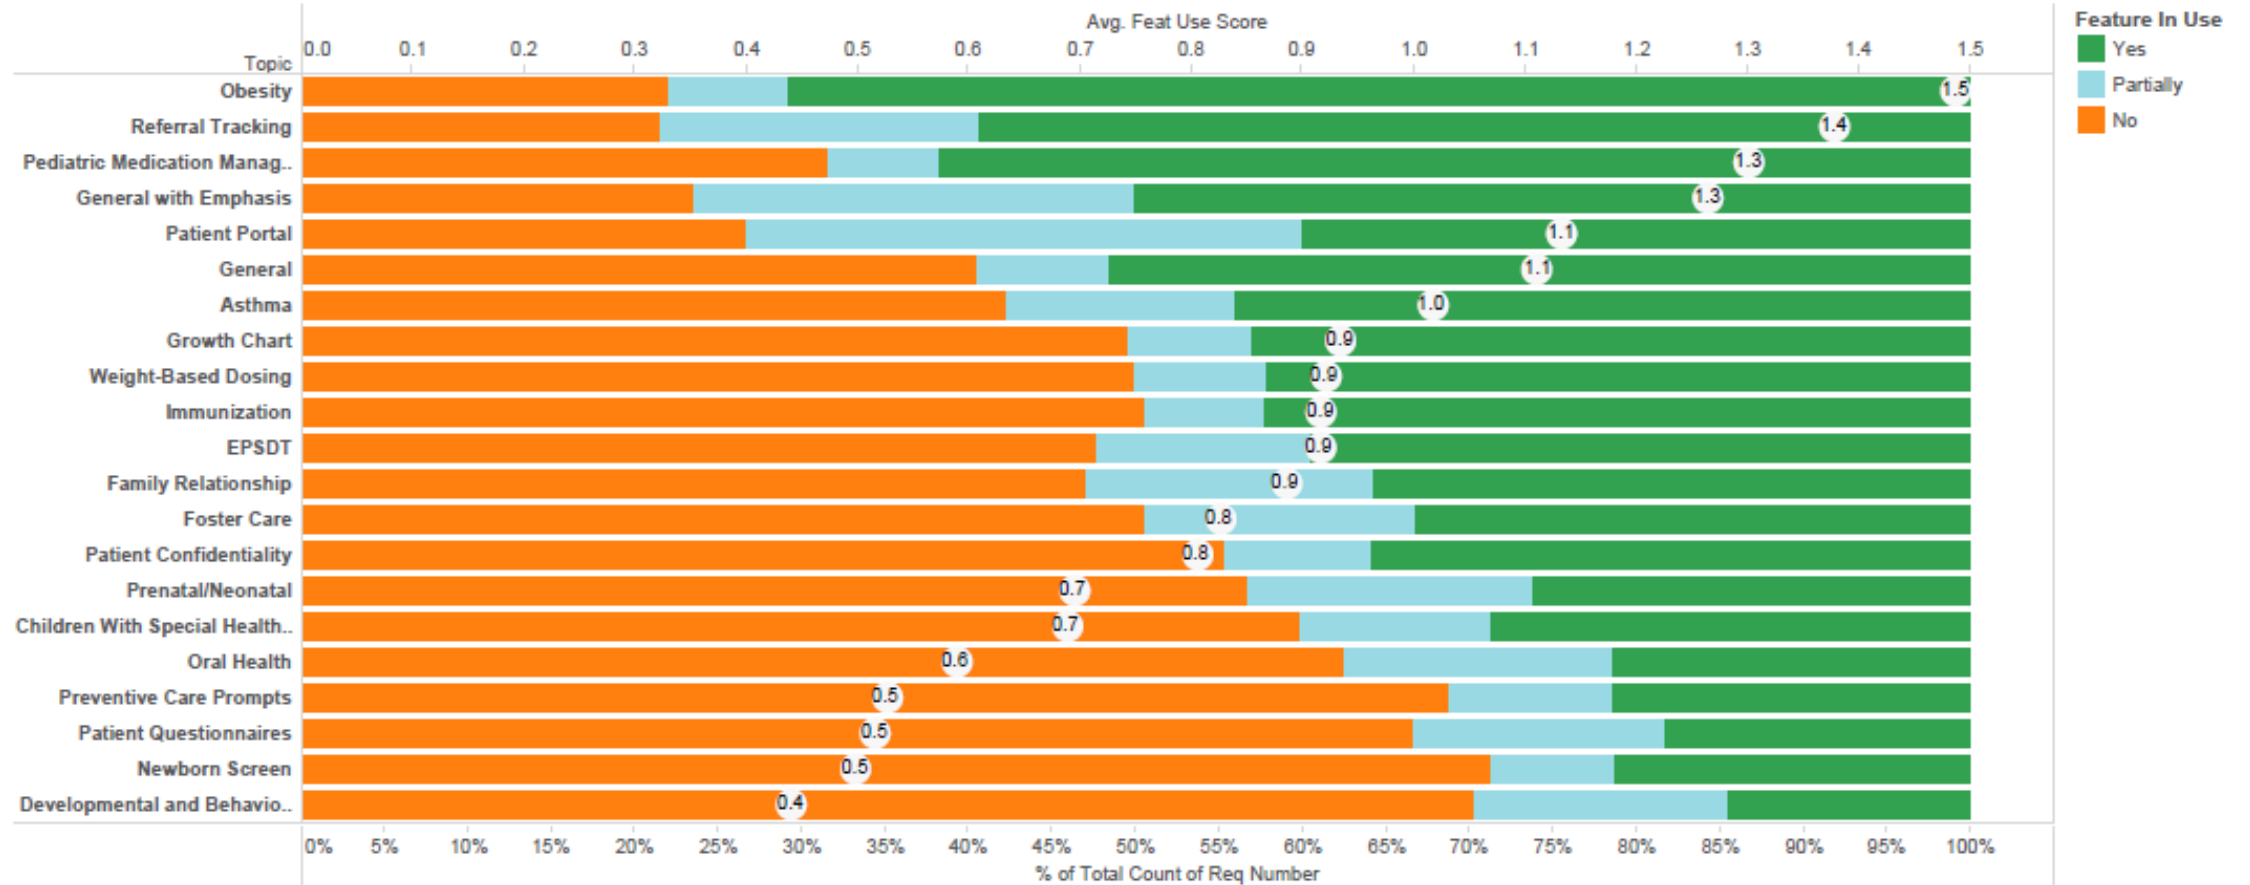

EHR Capable by Topic

# Feature in Use by Topic

This graph shows, by topic, the level of EHR capability that is in use by providers. Note that topics with more of the green color contain more requirements that are met in current EHR systems AND the EHR features and content they represent are in regular use by providers.

Feat in Use by Topic

# Count of Requirements by Topic

Note – requirements in the Model Format were re-organized by NC CHIPRA to better align with clinical quality improvement priorities.
