

# Opioid SPARC ECHO

Safety, Prevention, Awareness & Raising Confidence

## Join CCNC's New Approach to Chronic Pain Management & Opioid Safety

Much more than clinical knowledge is needed to successfully manage chronic pain and treatment regimens that include opioids. SPARC includes didactic presentations by experienced provider-educators on specific topics of interest and in-depth, case-based, and interactive discussions from the community providers' practices. Feedback and practical recommendations will be provided.

Enroll to participate in a twice a month 45-50 minute virtual case-based discussions from providers' clinical practice focused on the evaluation and treatment of common chronic pain disorders and safe use of opioid.

Gain up-to-date knowledge of scientific advances through brief didactic presentations on topics of interest to learners.

Enhance your knowledge around current guidelines for the safe use of opioids and other options for the treatment of common conditions that cause chronic pain.

Become an expert in your community through mentorship, education, and support.

## Enroll Now!
