*To date, all recommendations have been approved by leadership except for Command Center and Contact Center Recommendations.
Clinical Provisions in Response to COVID-19

Total COVID Provisions

- Recommend Keep
- Keep with Changes
- Consider
- Do Not Keep

Clinical Provisions N=130

- Recommend Keep: 71
- Keep with Changes: 39
- Consider: 3
- DO NOT KEEP: 17

375 Provisions ~500 Codes
NC Medicaid Response
Public Health Emergency
Proposed Permanent Changes to Telehealth Clinical Coverage Policy 1-H

- Redefines telehealth to include all forms of two-way, real-time audio telecommunications, such as telemedicine, telepsychiatry, teletherapy, etc.

- Adds coverage for virtual patient communications (telephone and online digital evaluation and management, interprofessional consultation) and remote patient monitoring codes.

- Eliminates restriction on "video cell phone interactions;" telehealth can occur over a HIPAA-compliant platform on any device with audio/visual capabilities.

- Eliminates restrictions on originating sites: an originating site can be the patient's home and there are no distance requirements between originating and distant sites.

- Eliminates requirements for referring providers.

- Expands eligible provider types (varies by service).

- Eliminates consulting provider language; medical examinations can occur without oversight from a consulting provider.

**Note:** Final decisions about which telehealth services will be covered or not covered are subject to change.
Next Steps: Clinical Policy Updates

The Benefits team is following a detailed process to update Clinical Policies and align with flexibilities recommended to keep or keep with changes in the Circuit Breaker.

1. Revise 1H Into Brand New Medicaid Telehealth Policy
   - June
     - Review and Revise New Telehealth Policy (Complete)
     - Physician Advisory Group (PAG) reviews and provides feedback (Complete)
   - July
     - New Telehealth Policy Posted For Public Comment (Complete)
     - Include cover letter communication giving context for New Telehealth Policy (Complete)
   - August/Sept
     - Complete Public Comment and Prepare New Telehealth Policy for Release

2. Revise service-specific CCPs for telehealth and non-telehealth circuit breaker recommendations
   - June
     - NC Clinical SMEs draft changes for applicable CCP changes (Complete)
     - NC Clinical SMEs present revised CCPs to Manatt and Leadership Team (Complete)
   - July
     - NC Clinical SMEs and Leadership finalize CCP revisions based on feedback gathered during the team meetings
     - CCP revisions are sent to PAG for review and feedback
     - CCPs are posted for Public Comment
   - August/Sept
     - Submit SPA requests for applicable CCPs
     - Complete Public Comment, Receive applicable SPA approval, Prepare Updated CCPs for Release
   - October
     - Coordinated release of updated CCPs and communications associated with changes

Clinical Policy change effective dates TBD due to pending extension of the Public Health Emergency

Based on the last 30 days of processing Telehealth and Virtual Patient Communication claims lines, **91.68%** were successfully processed and **8.32%** of claim lines were denied.

*Denials may be inflated by claims which were denied and resubmitted under a new TCN.

### Top 5 Paid Service Categories
- Psychiatric Diagnostic Evaluation and Psychotherapy
- Speech Evaluation and Therapy
- Enhanced Behavioral Health Services
- Office or Other Outpatient Service and Office and Inpatient Consultation
- Telephonic Evaluation and Management

### Top 5 Denied Service Categories
- Office or Other Outpatient Service and Office and Inpatient Consultation
- Telephonic Evaluation and Management
- Psychiatric Diagnostic Evaluation and Psychotherapy
- Speech Evaluation and Therapy
- Enhanced Behavioral Health Services
Telehealth and Virtual Communication Billing Guidelines

Based on analysis of denied claims, sharing information on top denial reasons that Providers can review and proactively address to improve successful and timely processing of their claims.

Bill using valid Place of Service (POS), refer to Telehealth and Virtual Patient Communication billing guide for details
Overall we have seen a strong adherence to Telehealth and Virtual Patient Communication Billing Guidelines, but we are seeing some claims billed with the incorrect place of service. Please refer to the Telehealth and Virtual Patient Communication billing guide available to NC Medicaid Portal for POS billing requirements.

Ensure your Service Location is on File and Address is Valid
This denial reason is not unique to Telehealth and Virtual Patient Communication billing rules. The service location provided on the claim must be on file with NC Medicaid.

Ensure active and valid Taxonomy is included
This denial reason is not unique to Telehealth and Virtual Patient Communication billing rules. Crossover claims are getting denied due to invalid or missing taxonomies. Crossover claims are claims for beneficiaries with both Medicaid and Medicare. These claims can be corrected and resubmitted to Medicaid as a secondary filing.

Medicaid Telehealth/Telephonic Uptake Analysis
A note on data source (DHB/CCNC)*

- Steep increases in telehealth and telephonic visits and an even steeper decrease in-person visits combined to produce dramatic increases in telehealth and telephonic visit ratios.
- General visits appear to be rebounding since mid-April.
- All visit types decrease with claims adjudication (dotted line).

Data pulled from DHB dashboard, contains ALL professional claims.
Ratio of Telehealth Visits to General Visits | 12/31/18 – 6/7/20

- Telephonic and telehealth visit ratios jump after DHB’s March 10th implementation telehealth/telephonic policy changes.
- Since this data contains all professional claims, the telehealth ratio is low. Later charts focus on specific provider types.

Data pulled from DHB dashboard, contains ALL professional claims
Primary Care/OB Telehealth, Telephonic and In-Person Claims Volume | 12/30/19 – 06/21/20

Volume for all modalities decreases with claims adjudication
In this chart, values for the Asian/Pacific Islander and Native American/Alaska Native subgroups for service week starting 06/15/2020 have been suppressed due to the small number of claims submitted to date.

Data pulled from CCNC dashboard.
Combined Telehealth/Telephonic to In-Person Ratios by Ethnicity | 12/30/19 – 6/21/20

Data pulled from CCNC dashboard, containing mainly primary care and OB claims
Under NC Medicaid’s global billing policy, many providers do not bill for OB services until delivery, this lag artificially deflates claims-based rates of OB/Gyn care.

Data pulled from CCNC dashboard, containing mainly primary care and OB claims.
Combined Telehealth/Telephonic to In-Person Ratios by Foster Care | 12/30/19 – 6/21/20

Data pulled from CCNC dashboard, containing mainly primary care and OB claims
Combined Telehealth/Telephonic to In-Person Ratios by Age Group | 12/30/19 – 6/21/20

In this chart, the value for the 65+ population for service weeks after 05/18/2020 has been suppressed due to the small number of claims submitted to-date for this subgroup for this time period.

Data pulled from CCNC dashboard, containing mainly primary care and OB claims.
Data pulled from CCNC dashboard, containing mainly primary care and OB claims
Data pulled from CCNC dashboard, containing mainly primary care and OB claims
Data pulled from CCNC dashboard, containing mainly primary care and OB claims.
Behavioral Health Telehealth, Telephonic Uptake | 12/30/19 – 6/03/20

- While in-person behavioral health (BH) claims (grey line, left chart) have decreased, telehealth claims (yellow line, left chart) have jumped. *This relationship produces the spike in the ratio of telehealth to in-person services represented by the yellow line in the chart on the right.*
- BH telehealth ratios for the two most recent weeks are higher than the ratios for any other service type in this analysis.

Closing Care Gaps: QI Action Planning
North Carolina Medicaid Quality Framework

The Quality Framework defines and drives the overall vision for advancing the quality of care provided to Medicaid beneficiaries in North Carolina.
Annual Medicaid Quality Management Cycle

• Quality Measure Monitoring & Reporting
  — Annual Measures
    • Stratifications—race/ethnicity, gender, geography, age, disability status
  — Track against national benchmarks; set targets
  — Quarterly tracking of select priority measures (child, maternal, adult)*

• Quality Improvement
  — Choose Annual Priorities (2020)
    • Well-Child Visits in the First 15 Months of Life
    • Well Child Visits 3-6 Years of Life
    • Childhood Immunization Status
    • Promote Health Equity
  — Mobilize DHB, CCNC, AHEC, other partners on QI action planning

*following slides demonstrate quarterly tracking
Childhood Immunization Status | 2016-2019 | Race/Ethnicity

Hispanic
48% (N=6,393)

Black
26% (N=5,707)
CCNC Care Alert Dashboard

- The data in this presentation are pulled from CCNC’s COVID-19 Care Alert Dashboard.
- Each care alert represents indicated preventive care that a beneficiary did not receive.
- Fewer care alerts is better.
Change in Volume of Overdue Preventive Care by Ethnicity - 1/26/20 – 5/30/20

Overdue preventive care has increased more among Hispanic beneficiaries than non-Hispanic beneficiaries across almost all categories.
