1st birthday checklist:

- Bake cake
- Buy presents
- Send invitations
- Schedule 12-month
checkup

Dear Parent/Guardian,

Your child's first birthday is time for celebration—and it's also time for an important checkup at the doctor's office.

Our records show that it is time to schedule your child's 12-month checkup.

If your child does not have a checkup scheduled, please contact your child's doctor soon.

At this milestone appointment, your child will get weighed and measured, have a full physical exam, and may receive CDC-recommended vaccinations.

Your child may receive shots at the 12-month visit to help protect against the following vaccine-preventable diseases:

- Hepatitis B
- Haemophilus influenzae* type b
- Invasive pneumococcal disease
- Polio
- Influenza
- Measles, Mumps, and Rubella
- Chickenpox
- Hepatitis A

You never know
where potentially
serious diseases
may be hanging
around.

VACCINATE ON TIME. EVERY TIME.

Models used for illustrative purposes only.

Dear Parent/Guardian,

You can help prevent potentially life-threatening childhood diseases—wherever they may be hiding—by making sure your child gets CDC-recommended vaccinations.

Records show that your child may have missed a vaccination.

Please contact your child's doctor to find out if you need to schedule an appointment.

It's important to keep your child up to date on CDC-recommended vaccinations.

Did you know?

Should an outbreak happen, babies who haven't received all their immunization shots could be at higher risk of developing a disease that could lead to hospitalization, disability, or even death.

This postcard is being sent by your child's health plan, health clinic, or health department. Financial support for this communication has been provided by Pfizer Inc. No patient-identifiable information has been or will be provided to Pfizer.

**Prepare your teen for
what's ahead.**

Get vaccines on time. Every time.

**Prepare a su hijo adolescente
para lo que está por venir.**

Reciba las vacunas a tiempo. En todo momento.

DEAR PARENT/GUARDIAN,

Now that your teen is 16, be sure to get vaccines recommended by the CDC. Records show one or more vaccines may be due—including for meningococcal disease.

B

Meningococcal disease is rare. But it could lead to severe illness.

Talk to your doctor. Two different kinds of meningococcal vaccines may be needed. Both are important and may help to protect against the most common forms.

One helps protect against groups A, C, W, and Y.

One helps protect against group B.

Both need multiple doses to complete the series.

*Recommended if not yet received.
CDC=Centers for Disease Control and Prevention.

This postcard is being sent by your teen's health plan, health clinic, or health department. Financial support for this communication has been provided by Pfizer Inc. No patient information has been sent or will be provided to Pfizer.

What do I need to do?

1. Call your doctor's office today.
2. Schedule your teen's in-office, 16-year-old well visit.
3. Talk about CDC-recommended vaccines. Help get protected that same visit.

CDC recommends these vaccines for 16-year-olds:

- ✓ MenACWY (groups A, C, W, and Y)
- ✓ MenB (group B)
- ✓ HPV*
- ✓ Influenza

ESTIMADOS PADRES/TUTOR,

Ahora que su hijo adolescente tiene 16 años, asegúrese de que tenga al día todas las vacunas recomendadas por el CDC. Los registros indican que podría estar pendiente de recibir una o más vacunas, incluyendo la vacuna contra la enfermedad meningocócica.

B

La enfermedad meningocócica es poco común. Pero podría conducir a una enfermedad grave.

Hable con su médico. Dos tipos diferentes de vacunas meningocócicas podrían ser necesarias. Ambas son importantes. Pueden ayudar a proteger contra las formas más comunes de la enfermedad.

Una ayuda a proteger contra los grupos A, C, W e Y.

Otra ayuda a proteger contra el grupo B.

Ambas necesitan múltiples dosis para completar la serie.

*Recomendado si aún no se ha recibido.
CDC = Centros para el Control y Prevención de Enfermedades.

Esta tarjeta postal está siendo enviada por el plan de salud de su adolescente, la clínica de salud o el Departamento de Salud. Pfizer Inc. ha brindado apoyo financiero para esta comunicación. No se ha proporcionado ni se proporcionará a Pfizer información personal identificable del paciente.

¿Qué necesito hacer?

1. Llame al consultorio de su médico hoy.
2. Programe la visita en persona para el chequeo médico de su hijo adolescente de 16 años.
3. Hable sobre las vacunas recomendadas por el CDC. Ayude a protegerle durante esa misma visita.

El CDC recomienda estas vacunas para jóvenes de 16 años:

- ✓ Vacuna antimeningocócica conjugada: MenACWY (grupos A, C, W e Y)
- ✓ Vacuna contra el meningococo del grupo B: MenB
- ✓ Vacunas contra el virus del papiloma humano: VPH*
- ✓ Influenza
